

Complete iPaaS for I.T. *and* Business Users

Integration Starts Here.

Fast, Easy, Complete Build Integrations Quickly and Efficiently

Everything you need to build simple or complex integrations.

Eliminate manual data entry, data exports, costly errors, delays, and processes managed with spreadsheets and email. Celigo's platform enables visibility across the organization—with fewer technical resources.

Intuitive

Designed for both I.T./Operations and Business Users

Flexible

Complete control with no code or advanced custom code options

Scalable

Supports hundreds, thousands, or millions of transactions a day

Complete

Full iPaaS functionality with comprehensive, turnkey integrations

Integration Apps

Robust, pre-built, & fully-contained integration flows between apps

Quickstart Templates

Quickly create 2 or more flows between apps within integrator.io

Any-to-Any Integration

Build custom integrations from scratch between any app combo

Marketplace

Choose from a vast ecosystem of supported apps

Operations Dashboard

Flow Builder

Orchestration

Mapping & Transformation

API Management

Monitoring & Alerting

Dev Tools

- Template Builder
- User Defined (Javascript)
- Connector SDK
- Integration App SDK

Celigo Integrator.io iPaaS

The only iPaaS with integrations Apps

Many other vendors offer recipes and accelerators that help connect different applications. However, **only Celigo offers Integration Apps.**

Integration Apps are complete, standalone SaaS applications that connect two applications. They are built on an iPaaS, which allows for a level of robustness and customization not possible with direct connections.

Flexible, Proven, Reliable Customize and Expand

Focus on your business, not maintaining integrations

As companies grow and processes change, Celigo's integrator.io iPaaS allows both technical professionals and business users to automate, customize, and expand integrations as needed—so they can focus on their core business.

Visual Design Interface

Guided user interface for API adapters, visual field mapping, drop-down menus, and other tools to accelerate integration development

Advanced Developer Tools

Advanced tools for creating and sharing stacks, generating tokens for direct API calls, building wrappers, and more

Prebuilt Integrations

Accelerate with prebuilt Integration Apps, reusable integration templates, connectors to hundreds of applications, EDI templates, and more

Actionable Dashboard

Full visibility to monitor, manage, and update integrations with access to error details and ability to re-run integrations

Complex Orchestrations

Support complex processes by integrating multiple apps and data sources as part of single integration flow

Universal Connectors

Connect with thousands of application or data sources using connectors for REST/JSON, XML, FTP, AS2, EDI, SQL, web hooks, on-prem and more

The screenshot displays the Celigo user interface. On the left, a 'My Integrations' dashboard shows a grid of integration cards, each with a status indicator (Success or Errors) and a connector icon. On the right, a detailed view of a sync process is shown, titled 'Sync Dynamics Items with Shopify + Amazon'. This view includes a visual flow diagram with 'SOURCE APPLICATIONS' (Microsoft Dynamics 365) and 'DESTINATION & LOOKUP APPLICATIONS' (Shopify and Amazon). Below the diagram is a table of connections:

Connection Name	Type	API	Queue Size	Actions
Celigo FTP	FTP	Sandbox FTP to Production	0	[Dropdown]
Skubana	REST API	http://demo.skubana.co/service/v1	0	[Dropdown]

Prebuilt integrations available on the Celigo Marketplace

Common Integration Use Cases

- Lead to Subscription
- Procure-to-pay / Purchasing
- Warehouse-to-3PL
- Catalog & Listings / Merchandising
- Pricing & Repricing
- Suspect-to-Prospect + Repeat Sales
- Cart-to-Order
- Order-to-Fulfillment
- Issue to Resolution
- Services Provisioning
- Order-to-Cash
- Inventory & Replenishment
- Payment-to-Reconciliation
- Hire-to-Retire
- Collaboration
- Reporting & Analytics
- Office Productivity

The vision of Celigo is to make automation as simple as possible by enabling anyone in the enterprise to build or deploy integrations.

“

Our business model relies on integrations. We are at the forefront with our strategy because we understand the importance of integration. Getting up and running with a platform that's got pre-built integrations is much nicer than all of the other platforms I've used. Using Integration Apps on Integrator.io would be a massive advantage to any business

— Jason Ross, CIO, GetBusy

“

I want to focus the developers on business growth initiatives and not use that level of technical talent for integrations. Celigo helps me achieve this by making integrations more self-service.

—Kiko Stefanov, IT Director, Zoro Tools

“

With Celigo, we can have functional consultants manage business requirements and build the integration. This dramatically improves time-to-value.

—Matt Kenney, RSM Principal
