**Blytheco Chosen as a Sage Extended Solutions Preferred Development Partner**

Laguna Hills, California – December 11, 2009 – Leading Sage business partner Blytheco, LLC is pleased to announce that the firm will serve the Sage channel as an Extended Solutions Preferred Development Partner, following Sage’s announcement of the phase-out of Sage Extended Solutions. This phase-out process includes incorporating the main features and functionality of many of the top Extended Solution titles into the core product and offering “retired” titles through Extended Solutions Partners like Blytheco.

The Sage Extended Solutions catalog is a library of enhancements to Sage MAS 90 and MAS 200 that were originally designed to meet the specialized needs of customers. Blytheco has been a Sage business partner since 1980 and a member of the Master Developer program since the inception of the program. Our sixteen-person development team is the primary resource for Integrated Solution Vendors (ISVs) seeking to create integrations to Sage products. Blytheco offers an extensive catalog of robust vertical and productivity solutions to complement and extend standard Sage Software applications.

Blytheco will continue to offer and support Sage Extended Solutions by upgrading them to current and future versions as well as adding additional functionality or titles to the collection. Several of Blytheco’s developers are former employees of the Sage Extended Solutions development team, and their experience provides Blytheco with a unique advantage in upgrading and supporting these enhancements. Blytheco has over 900 Extended Solutions installed throughout our client base and we are committed to their continued support for our valued clients.

“We are proud to support Sage’s effort to simplify their product portfolio by becoming a Sage Extended Solutions Preferred Development Partner,” said Blytheco CEO Stephen Blythe. “This role reinforces our position as one of Sage’s most innovative partners, and we look forward to working with Sage customers to help them use their Sage business systems as effectively as possible.”
