Blytheco, LLC Launches New Products at Sage Insights 2008 Partner Conference

Laguna Hills, CA – May 27, 2008 – Blytheco, LLC, the premier Sage Software business partner, announced the launch of several new product offerings to complement Sage Software solutions at last week's Insights 2008 Sage business partner conference.

Blytheco announced new integrations with sales tax calculation and reporting solutions. Blytheco's integration and development division, BlythecoDev (www.blythecodev.com) will build an integration that links the SpeedTax solution -- SpeedTax MANAGER™ -- to Sage's MAS 90 and MAS 200 ERP software systems. In addition, Blytheco, LLC will become a reseller of SpeedTax solutions, offering the newly-integrated solution to its Sage MAS 90 and MAS 200 ERP customers.

The official launch of Blytheco's Collect-It enhancement for Sage MAS 90, MAS 200, and MAS 500 was also well-received at Insights 2008. Blytheco is offering the free enhancement, which provides a simple way to automate collections tasks via data interface with Transworld Systems' Greenflag web-based collections tool. During an economic down-turn, control of accounts receivable and an efficient collection system are critical to maintain positive cash flow. Collect-It delivers, and at a great value to customers. This is the first of many future BlythecoDev modules that will be offered at no charge to Sage business partners and customers.

In March 2008, Danny Baker was appointed VP of Development and is responsible for the management of the 17 U.S.-based staff that make up the Blytheco development team. "Our development team has been hard at work creating enhancement tools that we hope will be key strategic offerings for the Sage channel," said Stephen Blythe, CEO and founder of Blytheco, LLC. "Our plan is to continue to design and market complementary solutions that add value for business partners and end-users, and to serve as a development resource for Sage partners who require more specialized customization services. Blytheco is honored to be the integration partner of choice for third-party vendors and Independent Software Vendors that wish to integrate their products with Sage Software solutions."
