

## American Red Cross–Tulsa Area Chapter Uses Sage FAS Nonprofit to Avoid Disasters

The Tulsa Area Chapter of the American Red Cross helps residents in 15 Oklahoma counties prevent, prepare for, and respond to emergencies. In 2007, volunteers responded to 579 home fires, assisting families with clothes, food, replacement medications, a hotel stay and the first month's rent at a new home. Also, the chapter taught more than 18,000 people the lifesaving skills of CPR, first aid, and the use of an automated external defibrillator. Children are taught water safety, first aid, and how to be safe when home alone, along with disease prevention and emergency preparedness. At the Red Cross, there is no such thing as a small disaster— they want everyone to be prepared.

ARCTAC has a sizable array of fixed assets, including equipment, buildings, computer systems, furniture, a fleet of trucks, vans, trailers, semis, and other vehicles. It had always managed the assets manually using paper and spreadsheets, which was very time consuming, and made detailed fixed asset depreciation reports difficult to generate. An external auditor suggested automating with FAS Nonprofit Asset Accounting, a comprehensive fixed asset management solution designed specifically for nonprofits.

### Monthly Depreciation

ARCTAC now uses FAS Nonprofit Asset Accounting to manage its entire fixed asset lifecycle, from acquisition to disposal. Sage FAS Nonprofit Fixed Assets provides a complete overview of the agency's fixed assets.

"Our initial hope was that Sage FAS Nonprofit would allow us to prepare monthly depreciation journal entries, which were previously done only quarterly or at year's end," says Chandra Binder, accounting specialist. "After installing the software, we learned it could do all that plus so much more."

Having monthly depreciation entries allows ARCTAC to spread expenses evenly throughout the year. The organization can also allocate depreciation over multiple locations and departments, for better management decisions.

### System

**Sage FAS Nonprofit 100 Fixed Assets**

- FAS Nonprofit 100 Asset Accounting

### Challenge

Manual tracking of the chapter's diverse fixed assets was cumbersome, time consuming and made depreciation reports hard to produce.

### Solution

FAS Nonprofit Asset Accounting, integrated with the organization's nonprofit management systems.

### Results

Sage FAS Nonprofit has trimmed 30 percent of the time the agency previously spent on fixed asset tracking, depreciation, and reporting.

## Easy Reports

Sage FAS Nonprofit has given ARCTAC great reporting capabilities. The software has enhanced its ability to identify individual assets, create depreciation expense reports, and summarize assets by class, department, or location. It's simple to print a list of the assets assigned to a specific office and then ask staff members to verify it. This has proved to be a tremendous benefit for keeping tabs on the status of assets, and determining which ones need to be disposed of or replaced.

Sage FAS Nonprofit also provides reporting options that were never available to the agency before. "We can always balance to the general ledger after making an entry," Binder says. "And with the monthly analysis detailing journal entries, I can inspect the data and automatic calculations, and make adjustments wherever necessary."

## Saving Hours of Effort

ARCTAC has had an opportunity to use Sage FAS SupportPlus, its technical support and maintenance plan. It found representatives to be very helpful, and issues were resolved quickly.

The software will play a major role in the department in the next few months. "We will soon begin a major project, disposing of dozens of fixed assets," says Binder. "So I will really get to put my knowledge to the test then—and am confident Sage FAS Nonprofit will save countless hours of effort."

Best of all has been the time savings the agency has experienced since implementing the software. "FAS Nonprofit Asset Accounting is saving 30 percent of the time we used to put into manual tracking and reporting," says Binder. "We can hit a button and pull up information in seconds, rather than spending hours with a calculator. The software helps us make better management decisions and be more efficient with limited resources."

"FAS Nonprofit Asset Accounting is saving 30 percent of the time we used to put into manual tracking and reporting . . . The software helps us make better management decisions and be more efficient with limited resources."
