

# Time & Attendance System

**BCG SYSTEMS, INC.**

Positively impact productivity and earnings with BCG Systems' MAS 90/MAS 200 Time & Attendance System. This cost effective record keeping system for payroll input gives managers the information they need to increase productivity and control overtime expense.

Because it is fully integrated to work with Smart Clock (Costal Data) timekeeper system and MAS 90/MAS 200 Payroll, your users will now be able to capture and move the following data from your automated time clock, directly to your payroll system, with no re-keying:

- Department
- Employee
- Deduction/Earning Code
- Hours
- Rate (when supplied)
- Transaction Date
- State Code

## Add to Your Bottom Line

You can enhance the MAS 90/MAS 200 Payroll module with our Time & Attendance System. It eliminates the need for timecards, their preparation, tallying, posting and storage. And users will have the tools they need to:

- Manage scheduling
- Account for the time employees are on the job
- Track absences, tardiness, overtime, vacation and personal time

More enhancements are on the way, including the ability to import Job Cost information.

## Easy to Use

With our Time & Attendance System, employees simply swipe their time clock badges through the reader and go to work. The data is stored in the clock, then transferred into MAS 90/MAS 200 Payroll. The software does the rest – calculates the time, adds notes on the exceptions, multiplies the pay rate times the hours and provides a selection of up to 50 reports.

## Control & Convenience

- Presents straightforward data in up to 50 reports
- Includes sorting and selection capabilities to provide on-screen data per your specifications
- Provides the ability to fix missing in and out punches automatically
- Accommodates a network system with unlimited concurrent PC users
- Archives Punches for 20+ years
- Supports multiple locations and can even accommodate network connections
