

## BizInsight for MAS500 – System Requirements

These hardware and software requirements address new installations of BizInsight for MAS500 product at customers running MAS500.

The following are the minimum suggested hardware and software requirements.

### Security Requirements

- Local administrator login and password temporarily required for installation of BizInsight for MAS500.
- Windows NT authentication or a SQLServer read-only account and password is required for Database Connection

### Database Connection

From the client's PC a connect string is required to expose your MAS500 data. Your dba or administrator need to provide the following information:

- Data Source – Name of the server managing MAS500 database
- Initial Catalog – Name of the MAS500 database, i.e. "MAS500\_app"
- Credentials to the MAS 500 database
  - Windows Authentication will be Integrated Security – Should be SSPI
  - SQL Authentication – need user name and password

### Standard Default Directories

- BizInsight should be installed at C:\Program Files\BizNet Software\BizExceleratorMAS500
