

Sage Credit Card Processing

A complete payment processing solution, Sage MAS 90 and 200 Credit Card Processing powered by Sage Payment Solutions module gives Sage MAS 90 and 200 customers the benefits of comprehensive business management coupled with the benefits of credit purchase processing — all from Sage Software. What's more, having all payment processing in-house with Sage Payment Solutions enables Sage Software to pass savings onto our customers, resulting in a lower total cost of ownership.

Studies show that more and more purchases are being made with credit cards each year, and vendors accepting credit cards increase their sales by 15 to 50 percent. Sage MAS 90 and 200 customers can take full advantage of this opportunity with the ease and efficiency offered by fully integrated credit payment processing.

Credit Card Processing powered by Sage Payment Solutions provides a complete credit card processing solution for mail order, telephone order and Internet businesses, including corporate and government purchasing cards. Data can be entered through the Sales Order and Accounts Receivable modules and .store and .order e-Business Manager applets. Transactional information, such as authorization codes, is captured and stored for historical and reconciliation purposes.

BENEFITS:

Automatically connects to Merchant Accounts for credit card authorizations and settlements

Process payments using Sales Order, Accounts Receivable, and e-Business Manager modules

Complete, secure, 24/7 online transaction reporting

Stored credit card numbers are encrypted within Sage MAS 90 and 200

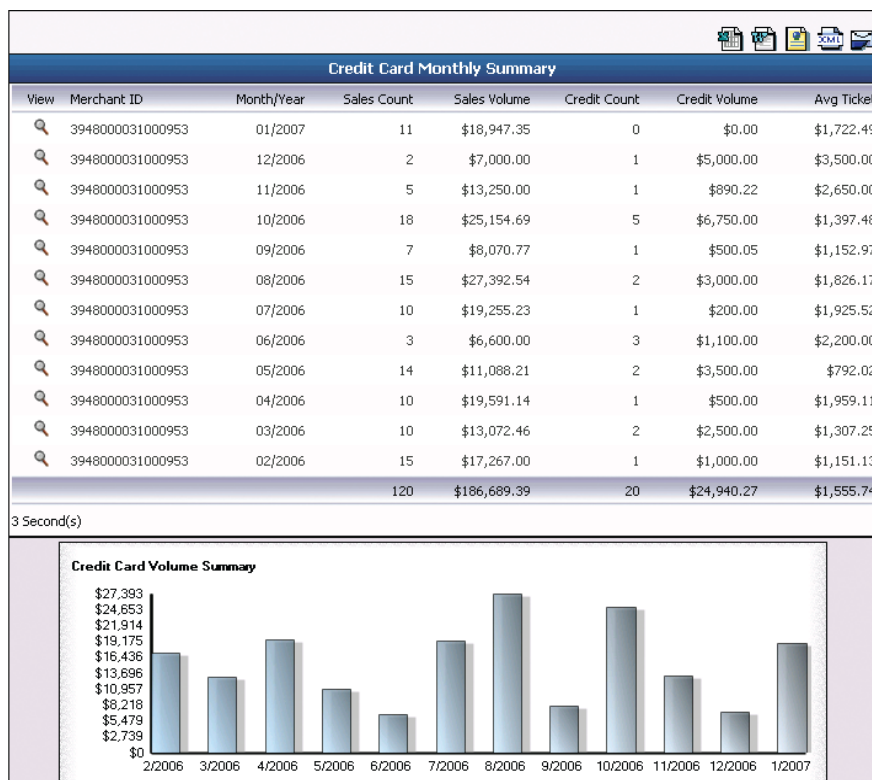

Credit Verification Value (CW2) is fully supported to help verify card authenticity

Compliant with Visa and MasterCard Payment Card Industry (PCI) data security standard

Multiple address verification options add an additional layer of credit card authentication

User-level password protection reduces the possibility of unauthorized access into database content and functions

◀ Increases operational efficiency with full online reporting, including historical data. Real-time reports allow you to see:

- Settled batches
- Deposit amounts
- Statements (current and historical)
- Chargebacks
- Transaction history
- Returns and Credits
- ACH information

FEATURES

Works the Way You Do

Sage Credit Card Processing by Sage Payment Solutions adds functionality in key areas of Sage MAS 90 and 200 - Sales Order and Sales Order Invoice Entry, Accounts Receivable, e-Business Manager .order and .store applets, Customer Maintenance, and Payment Type Maintenance.

Credit Verification Version 2 (CVV2)

CVV2 helps verify card authenticity by validating that purchasers do, in fact, have the card in their possession, which helps reduce chargebacks for e-commerce and mail order purchases.

Address Verification Services

Address verification services add another layer of credit card authentication by comparing the purchaser's billing address with the billing address on record.

User-Level Password Protection

The system's multiple password layers increase the security of customer card numbers and information by reducing the possibility of unauthorized access into database content and functions.

Data File Encryption

The system's data file encryption capabilities further increase the security of customer data by enabling you to encrypt credit card account numbers in the database.

Merchant Account provided by Sage Payment Solutions

Sage Payment Solutions has made it easy for businesses to accept electronic payments for more than 17 years. Funds collected from credit card transactions are automatically deposited into your existing business bank account.

Online Reporting

Secure online access to all your key transaction information is included for your merchant account, 24/7, at www.myvirtualreports.com.
