

Your business in mind.

SAGE MAS 500

BUSINESS INSIGHTS ANALYZER

WITH BUSINESS INSIGHTS ANALYZER YOU CAN:

- View critical real-time information about your business, in summary or detail including:
 - Budget Analysis
 - Sales History
 - Purchase History
 - Project Profitability
 - Production Analysis
- Quickly add or remove columns to view.
- Cash Account History
- Customer Sales History
- Salesperson History
- Vendor History
- Inventory History
- Inventory Transaction History
- Resource Utilization
- Group, sort, and filter the data as needed.
- Create on-the-fly sums, averages, counts, or minimum/maximum.
- Create and save multiple customized configurations.
- View data in grid, pivot table, or chart formats.
- Create customized, interactive charts and pivot tables for your data.
- Extend capabilities by adding additional SQL views.
- Export data to Excel, Word, or XML dataset.
- Launch a report wizard to easily create a Crystal Report® based on the data in the view.

The grid interface provides powerful sorting, grouping, and filtering, allowing you to quickly locate and analyze data.

In today's competitive marketplace, successful companies must minimize their risks and make better business decisions faster than ever before. The ability to quickly access critical business intelligence and analyze it for strategic decision making can make the difference between thriving and merely surviving. The Sage MAS 500 ERP Business Insights Analyzer can help you make better business decisions by providing you with insights into your business data. Now you can act quickly, decisively, and confidently to maintain your competitive edge. Business Insights Analyzer is an intuitive, easy-to-use analytics tool included with Sage MAS 500. Information is provided in a logical grid format with powerful filtering, grouping, and sorting capabilities that let you organize the data in the way most appropriate to the task at hand. You also have the added flexibility of analyzing each view using the included Excel pivot tables and charts. Business Insights Analyzer was created with Microsoft .NET and SQL Server technology, and offers system administrators the ability to easily create additional analytical views for Business Insights Analyzer.

Sage MAS 500

Business Insights Analyzer

Sage MAS 500 Business Insights Analyzer can help you make better business decisions by providing you with insights into your business data empowering you to turn these insights into strategic action.

BETTER, FASTER DECISION MAKING

Access to Critical Information

Sage MAS 500 holds a wealth of information about your business. Business Insights Analyzer presents this information in a series of logical views that allow you to easily access critical information.

The included views are:

- Budget Analysis
- Sales History
- Purchase History
- Project Profitability
- Production Analysis
- Cash Account History
- Customer Sales History
- Salesperson History
- Vendor History
- Inventory History
- Inventory Transaction History
- Resource Utilization

Increased Productivity

Productivity is increased when users focus on analyzing data and running the business rather than on finding, organizing, and putting the data in a useful format.

Access

Real-time data is displayed in an interactive grid format with powerful filtering, sorting, and grouping capabilities. Columns of data may be rearranged, and calculations such as sum and average can be made.

Analyze

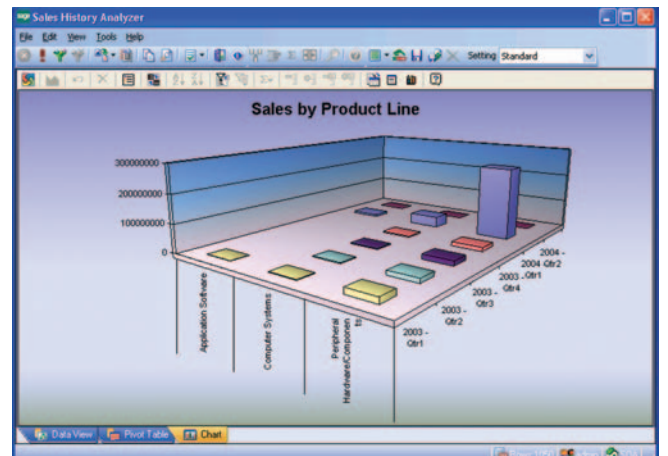

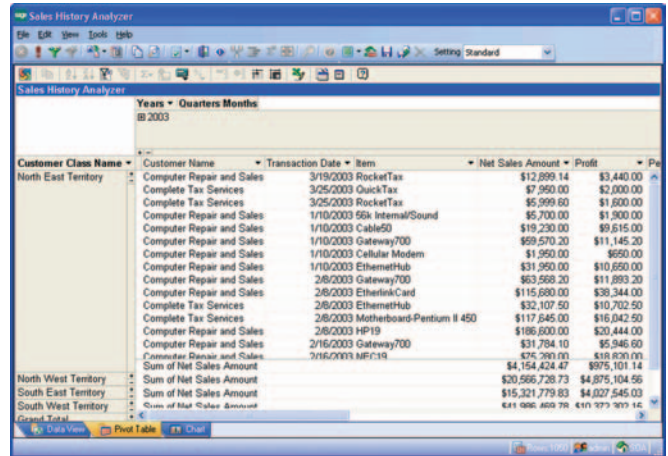

Excel pivot tables and charts are provided in addition to the grid view. Users of Microsoft Office XP or Office 2003 can interact with the pivot tables and charts, selecting the dimensions and measures to perform the precise analysis required.

Act

Executives and knowledgeable workers can make better informed decisions about the operations of the business when critical, up-to-date information is available on demand.

Customize

Create and save multiple settings of various analyses for future reference. New SQL views can be created and easily hooked into Business Insights Analyzer.

Users with Excel XP or Excel 2003 can quickly create custom charts and pivot tables.
