

DCWarehouse... The Industrial Strength Solution!

"DCWarehouse allows our clients to access critical business information that affects their bottom line."

*- Stuart Tholen, Director of Technology, SGS Technology
www.sgstech.com*

DCWarehouse

Clients are demanding more. If you can not meet their demands you will lose business.

Other vendors claim to offer true warehouse automation and real-time inventory control. DCSC's DCWarehouse is the only solution that truly delivers.

DCWarehouse was developed as a result of fifteen years of real-world consulting experience. Through countless software implementations we realized the need for many of the features found in DCWarehouse. As a result, DCWarehouse has evolved into a mature, robust, proven solution.

Why do I need Warehouse Automation?

If your company operates one or more warehousing facilities, you understand the need to be able to react quickly to customer or distributor orders by your ability to fulfill requests. Further, by controlling inventory

and predicting inventory needs, you can optimize operations and increase profits.

This is the promise of Warehouse Automation. The problem with most solutions, however, is that they don't integrate well with new or existing business systems. Inventory management is not real-time, and they use proprietary databases. These systems don't integrate directly with shipping carriers such as UPS, Federal Express or Airborne/DHL.

DCWarehouse quite simply is built as a native component to Sage's MAS 500 Software. Therefore all transactions are updated to one database, all the software looks and feels the same and deployment is simple!

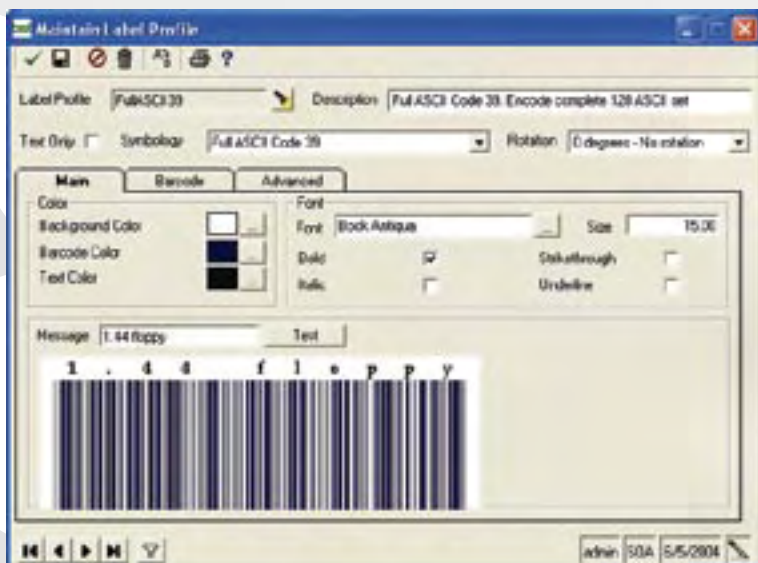

Make your Warehouse Accountable!

Human error is a major factor in inaccurate picking, packing counting, shipping and moving inventory and can cause substantial losses over time.

Every time you enter data manually into a system, there is a potential to make a mistake. DCWarehouse uses RF/Mobile Devices along with bar-coding to reduce errors.

DCWAREHOUSE AUTOMATION FEATURES AND BENEFITS

Feature	Benefit
Simple Installation & Deployment	No need to purchase separate software packages for shipping and WMS. Our solution eliminates expensive integration and endless consulting.
Integrated to Master Database	Need for redundant data entry is eliminated. All transactions update database in real time so data is immediately accessible.
RF and Mobile Technology support	With mobile data collection devices, warehouse control is more efficient and less error-prone. Create purchase orders or requisitions directly from handheld devices.
Integrated Shipping	Real-time rate calculation and shipping label generation for UPS, Federal Express and Airborne/DHL allows for streamlined shipping and reduced data entry.
Built with MAS 500's Tool Set	DCWarehouse is a native component of this ERP System. All transactions update one database real time.
Flexible Configuration	A multitude of options allows DCWarehouse to adapt to your specific business needs.
Bar Code Support	DCWarehouse supports multiple bar code types including UPC Compliant labeling.
Labeling	No need to invest in "label making software" or expensive printers.
Customer Returns	Real-time support for customer returns and RMA generation.
Serial Number support	Auto-generate serial numbers.
Productivity Inquiries and Reports	You will increase accountability by knowing who picked, packed and shipped each item/order. You will also see each individual's production for any given time period.

SAGE MAS 500

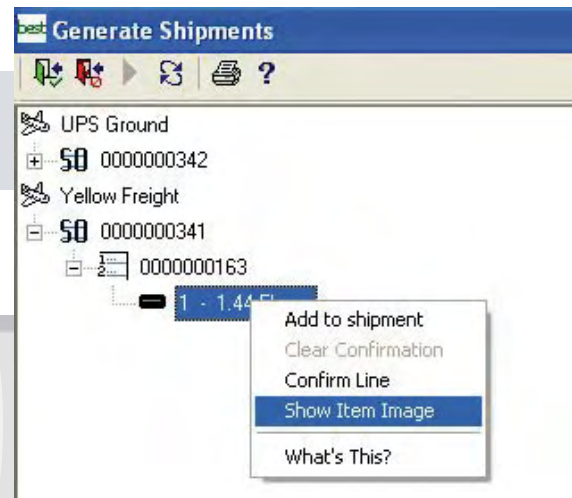

"When servicing our Distribution and Manufacturing Customers, a huge advantage to any ERP implementer like BHE, is to be able to provide a WMS solution that is not only written in the same tool-set, but rich in functionality as well. Such is the case with DCSC's DCWarehouse Automation Solution."

- Russ Carey, Vice President, BHE Consulting, www.bheconsulting.com

DCWarehouse Features and Benefits Continued

Feature	Benefit
Pick lists can be generated by Sales Order, Warehouse, Priority, logical sequence, Item, Ship-to, and Drop Ship	Complete flexibility in picking products for shipment. The most robust picking features in its class. Sorting aids in meeting specific shipping requirements for your valuable customer.
Pick by bin, serial/lot #	Pickers are directed to specific bin where they can pick specific serial/lot #.
DCWarehouse Automation Picking	Provides wave picking, rapid picking or many other picking types based on your business process. This means you can pick to a box (typically for smaller orders) or pick to a central location.
DCWarehouse Automation Graphical Warehouse Manager With Drag and Drop Capability	A warehouse manager can see all orders as they are placed by customer service. He/She can select orders to be picked and shipped. Simple visual screen allows for quick decision and analysis of activity. He/She can sort orders based on priority, shipment methods, customer type, order type, etc.
DCWarehouse Automation Cycle Counting	Extend Cycle Counting of MAS 500 into mobile environment. Improved counting, can count by ranking (Gross Margin, Hits, Sales Volume, Item Value), bin, item, item type and more.
Inventory Transfers and Movement	Transfer or move inventory on the fly.
DCWarehouse Bin Replenishment	System suggests where to put fast moving items and when to replenish a fast pick area.
DCWarehouse Automation Inventory Space Utilization	Allows system to recommend open bins with enough space for storage and put away.

MORE FEATURES AND BENEFITS

Feature	Benefit
DCWarehouse directed put away and optimized inventory movement	Our system directs user's to the closest empty bin which saves travel time through your warehouse. Dynamic Bin Replenishment assures you have enough stock in your fast moving bins.
DCWarehouse Automation Package Manager With Approved Federal Express and UPS Shipping Tools	In a completely automated process flow, you can quote shipment based on item/weights etc. Boxes identified via bar-code, bill of lading, packing documents and label all printed automatically to any laser printer. Multiple items form the same sales order tracked to box and shipping. Eliminates expensive and poorly integrated shipping systems and hardware.
DCWarehouse Bar Code Engine (No third party label making software is required!)	The Warehouse Automation Bar Coding Module offers you the ability to create bar code format in many different types. The bar codes can print any standard MAS 500 Field or Customer Field. You can print bar codes using any standard Laser Printer or Thermal Printer. Full support for UCC Compliance Labeling.
DCWarehouse Reporting	DCWarehouse has many Warehouse Reports to assist and analyze production; space utilization, real time inventory valuation and you have the ability to customize all reports.
DCWarehouse Automated RMA Processing	All returns can be handled via your mobile device, validated against an RMA and put away to a returns processing area. You can determine if return requires a replacement item and if you use serial or lot tracking this will be automated as well.
DCWarehouse Fully Automated Lot and/or Serial Number Control	Automatically generate serial numbers, track lot information, validate serial, and lot information. Real time visibility of serial and lot items.
DCWarehouse Container Tracking	Importers and Distributors can automatically track purchased items via their transport container and receive items via mobile/rf devices per containers as they hit your receiving dock.
DCWarehouse EDI Integration	DCWarehouse completely integrates with eBridge® EDI Solution. This results in a true end to end solution for clients requiring EDI capabilities with suppliers and customers. ASN's generate automatically when shipping items from the packaging manager solution.
DCWarehouse Assemble/ Dissassemble Kits	Within the Warehouse Automation Module you have the capability to process the assembling and disassembling of kits. This process allows for the automatic update of the kit to inventory and the release of inventory component parts in real-time.

"I traveled to St. Louis for several days of training and to meet the team. The entire group was very welcoming. Every DCSC Inc. Staff Member has always put their best foot forward to show they care about their customers' satisfaction and successful implementation of DCWarehouse. This is a solid warehousing product, even if you only plan on using only a portion of the software it is a great value!"

- Danny Millikan, IT Director, Southwest Oilfield Products, Inc., www.swoil.com

"Real Time scanning for MAS500 doesn't need to be expensive or complicated. We are using network terminals with tethered scanners for DCWarehouse Automation to report serialized production with backflushed components. The ROI is more than justified!"

- John Sutton
Director of Materials & Systems Management
Snyder Industries, Inc.
www.snydernet.com

"DCSC's staff has worked diligently to meet our company's warehousing and fulfillment needs. DCWarehouse Automation is a fine product for companies that do not want the hassle of maintaining two separate software systems. I appreciate the distribution experience DCSC has brought to the table and the cooperation between our reseller, BHE Consulting and DCSC Inc.!"

- Phil Padgett, President, Package All

"DCWarehouse enabled Masterpieces to quickly achieve our goal of improving the accuracy of our fulfillment processes while increasing visibility (and accountability) across all steps."

- Daniel Echveste, Director of Operations
Masterpieces, Inc.
www.masterpiecesinc.com

"Support from DCSC Inc. has been very good and helpful!"

- Terry Scala, Logistics Planning Manager, DMI
www.dminj.com

"Our hands on hunt and search process is basically over! DCWarehouse has simplified our operations and improved our inventory accuracy!"

- Duane Kohler, Warehouse Manager
Portage Plastics
