

Blytheco developed the Change Merge Codes Enhancement to simplify the procedures associated with changing a Master File Entry.

Improve Productivity and Efficiency

Change Merge Codes has the following features:

- Changes existing Codes in **All data files**
- Change/Merge multiple codes at one time (Customer, Vendor, Item)
- Change multiple companies at one time
- Complete Analysis and Error reports for all codes modified and data files affected.
- Codes can be batch entered and can be processed at night, unattended
- Groups of changes can be done with a Range Generation. (i.e. Change all or range of 01 Division to 03 Division)
- Parameters can be updated for future MAS 90 releases or Master Developer Enhancements
- Change/Merge Code entry will be posted to Utilities Activity Log
- Reports provide a complete status of all files modified and any errors encountered
- Master Developers can modify the Change Code Parameters to change custom Data Files
- Allow Codes to be Merged together
- **Numerics are incremented.** (i.e. Customer 1 Sales equals \$500 and Customer 2 Sales equals \$800. When Customer 2 is merged into Customer 1, Customer 1 Sales will equal \$1,300.)
- **Averages are averaged.** (i.e. Item 1 has 12 units at \$35 each average cost and Item 2 has 4 units at \$30 each average cost. When Item 2 is merged into Item 1, Item 1 will have 16 units at \$33.75 each.)
- **Sequenced records are maintained.** (i.e. Sequence numbers are used in the same Data File to avoid duplicate entries. The sequence number will be incremented to the next available number if the existing sequence is in use when a merge is being processed.)
- **Support text (string) numerics.** (i.e. Some numeric values are stored in a text field. These numbers can also be incremented via parameters in Merge Codes.)
- **Support Developer strings.** (i.e. The Developer string is in a text string, which allows all numerics in this text field to be merged.)

MAS 90 For Windows
ABC Distribution and Service Corp. (ABC) 03/06/01
Change Codes - Version 3.50 & Above RECORDS: 9 10:37 AM

MAS 90 – Changes 4 MAS 90 Codes

New Feature:
Blytheco's Change & Merge Codes enhancement has a new feature that allows you to change phone numbers (**for area code changes**) overnight. All you need is a list of the prefixes that are being changed and our enhancement will do the rest.
