

Standard Features:

Servicom, created by H2 Technologies is a full-featured service management system designed specifically for service and specialty contractors.

This enhancement is a link from Servicom to MAS 90 and MAS 200. It allows exporting customers out of MAS 90/200 to synchronize Servicom and MAS 90/200. This works with the Inventory and Accounts Receivable modules.

You have the ability to import transactions into MAS 90/200 from Servicom to reduce inventory or export item information from MAS 90/200. Also, you have the ability to import customers, invoices or export balances and customers.

This enhancement saves you numerous steps in the normal process of having to reduce inventory or invoice in both products.
