

Radio Frequency

Scanco's Radio Frequency Solution for MAS 90 and MAS 200 gives you on-line/real-time transaction creation capability for your data collected via handheld terminals. All transactions are validated real time, virtually eliminating errors. Each transaction is checked at the time it occurs.

When Scanco's RF Solution is used with the Sage Bar Code Module, you can truly automate inventory, physical counts, purchase order receiving, sales order shipping and invoice data entry. Scanco, Sage's MAS 90 & MAS 200 Bar Code Vendor of Choice, enables you to send your employees, unrestrained by computer cables, wherever the inventory is. Manual data entry is eliminated which is characteristically error-prone and time consuming. Error-free data flows into your MAS system rapidly and easily with the click of a button!

Consider the following benefits of the Scanco Radio Frequency Bar Code Solution:

- ◆ Real-time validation of data collected
- ◆ Cable free! Go anywhere to collect data
- ◆ Onscreen prompts guide you through the scanning process
- ◆ Beeps confirm valid and invalid entries eliminating human scanning errors
- ◆ Easy imports of data into MAS 90 or MAS 200—takes only the click of a button!
- ◆ Hassle-free upgrades—available either via diskette or e-mail
- ◆ Supports Microsoft Pocket PC and CE.Net Hardware.
