## ***Sage Software: Focused on Nonprofit Solutions***

**Sage Software** understands that software is a major investment and commitment for nonprofits. We know that the viability of your organization's continued work and ability to deliver programs can depend on the accuracy, efficiency and reliability of our products. That is why we work harder than any other vendor to provide the highest quality nonprofit-focused products and services.

---

*"Many of the current vendors serving nonprofits are niche companies without a lot of capital or flexibility. As a larger software vendor, our nonprofit customers can rely on us for the long-term for the support and the services that are necessary once they've made a commitment to a software product."*

Jim Foster  
Executive Vice President

## Who is Sage Software? A new home for established nonprofit products.

Nonprofits have trusted Sage Software solutions to help their organizations raise and manage their funds for more than a quarter century. We've built our nonprofit product portfolio by handpicking vendors with long-standing reputations in the nonprofit sector. We merged these established brands, trusted products and talented people into a unified, focused division, and backed them with the strength of a global organization. The company name may have changed, but the nonprofit division focus remains the same: producing powerful, intuitive products developed specifically to meet the needs of nonprofits.

### *A new name for established nonprofit products:*

MIP, the makers of NPS fund accounting products for over 20 years

JSI Fundraising, the makers of Paradigm and Millennium for over 20 years
