

Sage SalesLogix Compatibility Checklist

Hardware and software requirements for v6.2, v7.0, and v7.2.

The hardware requirements for Sage SalesLogix are to be used as a guideline only. Hardware requirements depend on the number of users, activity, size of database, number of records, Operating System, and RDBMS.

The software requirements show all qualified software for use with Sage SalesLogix.

Customers with active Maintenance & Support agreements may contact Technical Support if their environment includes components that have not been qualified. However, troubleshooting will be limited and no fixes related to the non-qualified component will be available.

Recommendations are in BOLD

indicates Qualified
