

AppEazy

from APPLIANZ

APPLIANZ

- Applianz Technologies
 - Based in Wichita, KS
 - Established in 2001
 - Currently supports over 275 AppEazy Systems & nearly 3000 users
 - Patented technology reduces upfront & ongoing IT investments

Mission & Purpose

- To provide a technology for small to mid sized businesses delivering the advantages typically reserved for large companies.
- On-premise technology with zero local support and maintenance needs.
 - Your Cloud in a Box!
- Provide business owners the chance to focus on their business, not their technology needs/pains.

What is Involved?

- Custom Designed, Enterprise Class High Performance Hardware = Speed and Reliability.
- Professionally Designed & Manufactured Systems = Quality & Consistency
- Host Linux 64-bit Operating System = Efficiency, Stability and Security
- Virtualization (VMware) = Virtualized Client/Server Workgroup Environment
- Microsoft Windows Virtual Machines (Sever & Desktops) = Standard Windows O/S Environments
- Complete Assurance Service Plan = Advanced & Reliable Services & No Hardware Maintenance

Complete Assurance

- Automatic Built in Remote Access Technology
- Nightly Automated Local & Off-site System Backups
- Disaster Recovery Services
- Lifetime System Hardware Warranty*
- Automated Appliance Software and Security Updates
- System and Hardware Monitoring
- Technical and End User Support

Remote Access

- No VPN, Terminal Server or Citrix Software or additional hardware required
- Every concurrent application user connects to a dedicated Windows virtual workstation
 - Eliminates need for remote access support and ongoing system maintenance needs.
 - New, refreshed desktop with every user connection, every time
- Encrypted remote user sessions using SSL & RDP Communication
- AppEazy client software handles all IP changes for mobile users
- Built in PDF creation & seamless printing integration

Automatic Backup

- Nightly System/Data Backup
 - Complete 30 days locally & off-site into secure data center every night
- Complete system replication and/or data restore for 30 days
- Local File Server Functionality & Storage Capabilities
 - Total physical storage capacity: 100-125 GB

Disaster Recovery Services

- Applianz maintains “hot spare” systems in its data center for disaster recovery situations
- Complete customer system can be replicated in our data center in 2-4 hours MAX
 - Never experience days of downtime with AppEazy
- No need to implement new server, reconfigure desktops or any other technical assistance

ve didn't realize until the system was up and running, was the magnitude of the cost

Advanced Security

- Completely Embedded System
 - No keyboard, monitor, mouse, disk drives, etc.
- Integrated Firewall provided by Host Linux Operating System
 - Securing communication both external & customers' LAN by default
 - Only allows access to secure ports on the system
- SSL Certificate (Secure Socket Layer)
 - Remote Access managed by SSL & RDP
 - 128 bit bi-directional encryption model

Supported Desktop Operating Systems

- Windows 98 – Windows 7 (32 and 64 bit)
- Macintosh OSX

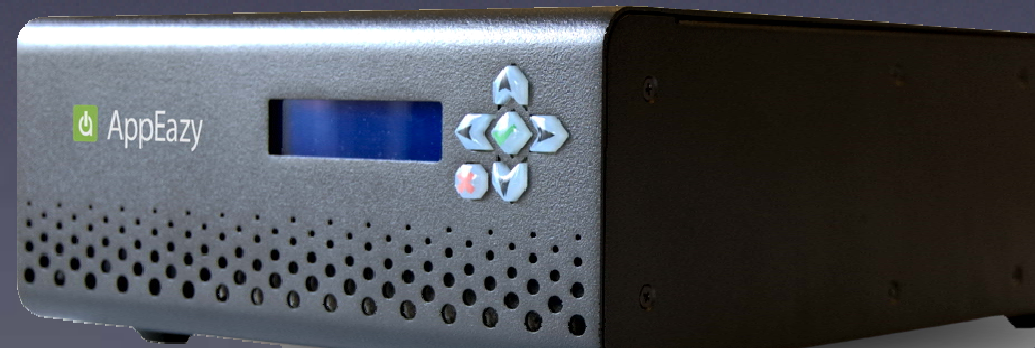

Pricing

Model & Users	AppEazy Virtualization Server	CompleteAssurance + Years
420M* (1-4 Users)	\$5,995	\$1,995
640E (1-5 Users)	\$7,995	\$1,995
1140 (6-10 Users)	\$9,995	\$1,995
2140 (11-20 Users)	\$12,995	\$2,995
3140 (12-30 Users)	\$16,995	\$2,995
4140 (31-40 Users)	\$21,995	\$2,995

The model 420 is designed for companies with a single application not running MS SQL Server and/or hosting a web server.

Summary

- A single server solution, pre-configured for all your critical software needs in one box
- Save time and money; reduce cost of total ownership
- All the benefits of a cloud computing or hosted solution with the comfort of local control and support
