

Avalara AvaTax helps NetSuite users get more out of their business management software, so they can manage their core business functions, including sales tax compliance, within a single, integrated system. AvaTax delivers all the SaaS capabilities NetSuite users expect, including validating addresses and instantly and accurately calculating tax rates and jurisdictional boundaries and rules.

What Netsuite users say about AvaTax:

“Since implementing Avalara AvaTax, we’ve halved the time we spend filing, reporting, and calculating sales tax. We were able to remediate \$8M in back tax in 20+ states quickly and start charging sales tax as soon as we received our VDA rulings.”

Marisa Massey, Controller
Bazaarvoice

“By outsourcing our tax management to Avalara, we can focus on running our company and let Avalara ‘worry’ about the tax rate application. With AvaTax, we’ve reduced time spent on sales tax management, reduced our audit exposure, and improved transactional tax accuracy so we remain compliant with regulatory commissions.”

Rick Gemereth, Chief Information Officer
Lionel, LLC

“Because of Avalara Avatax we were able to enroll, manage and comply with those states under the SST umbrella. Before AvaTax it would have been necessary to hire more employees just to manage these alone. If you want to be in compliance with sales tax rules, and save time and money in the process, Avalara is the direction you want to go.”

Meriann Munn, Controller
ProClip USA

“Avalara lowers the stress about product taxability and jurisdictional rules. AvaTax has helped us reduce time spent filling out and filing returns. These hours are now better spent on other projects.”

Ruby Shackelford, Tax Analyst
Superior International Industries, Inc.

With
AvaTax:

4 out of 5
companies dropped monthly
returns prep & filing to
less than one hour/month.

Top Reasons NetSuite Users Choose Avalara

- 1** Increased tax compliance, reduced errors
- 2** Elimination of manual processes (or reduced resource requirements)
- 3** Reduced risk of missing regulatory rule, rate, or form changes
- 4** Reduced risk of audit liability (fines and penalties)
- 5** Easy tracking of multiple returns and meeting of tax deadlines
