

Creating customized documents from Salesforce® is hard.

Employees painstakingly retrieve data and content, assemble documents by hand and then spend hours formatting the resulting output file. The entire document generation process is tedious, prone to errors and wastes valuable staff time. Until now.

Let Conga Composer take the words "copy and paste" out of your vocabulary.

Popular Use Cases

Conga Composer® helps you produce rich, data-driven output for a wide range of use cases in a variety of industry-standard formats.

Customize

Quickly create richly-formatted output using your Salesforce data in your format. Enjoy the flexibility of personalized templates while producing consistent output results every time.

Streamline

Simplify document creation and delivery to eliminate errors, increase productivity and save money.

Scale

Tackle unlimited use cases with a single app to increase user adoption across your entire organization. Generate thousands of documents per day without increasing staff resources.

A Solution You Can't Live Without

Conga Composer makes it easy to create sophisticated documents, presentations and reports from Salesforce by automatically populating richly-formatted templates with data from any standard or custom object or external data source via Lightning Connect. Working with industry-standard template formats to provide flexible presentation options, Conga Composer output files can be downloaded locally, stored in Salesforce, distributed via email or integrated with an eSignature or content management solution. Conga Composer can also automatically log activities, create follow-up tasks and even update fields. Better yet, take advantage of powerful automation functionality to transform a cumbersome manual process into a single button click or completely automated* solution.

How It Works

Create...

- ✓ Generate Word documents, Excel spreadsheets, PowerPoint presentations, PDF Forms and HTML emails
- ✓ Merge data from any standard, custom or Lightning Connect object with Salesforce reports or SOQL queries
- ✓ Include complex content like tables, images, rich text, charts, dashboards, custom fonts, watermarks and global currencies
- ✓ Conditionally display sections of a document, group data and calculate formulas according to business rules

Distribute...

- ✓ Choose how to deliver your files:
 - Immediate local download
 - Store in Salesforce as attachments, Chatter Files or Content records
 - Include as attachments to richly-formatted Conga Email Templates
 - Send for eSignature with DocuSign®, Adobe® Document Cloud eSign services or Sertifi™
 - Store in Google Drive™ or SpringCM™

Automate...

- ✓ Predefine options to run your solution in a single click
- ✓ Log activities, save copies of output files and update fields in Salesforce
- ✓ Trigger Conga Composer solutions with a Salesforce workflow rule*
- ✓ Batch and schedule Conga Composer solutions*

Technical Requirements

- Salesforce Professional, Enterprise, Unlimited, Performance and Developer Editions
- Salesforce Sales Cloud, Service Cloud, Portals, Communities and Platform Editions
- Supports Microsoft® Office 2013 (Mac 2011) and earlier for Word, Excel and PowerPoint templates; Adobe® Acrobat® XI and earlier for PDF Forms
- Compatible with Firefox, Chrome, Internet Explorer & Safari
