

GET A RAPID RETURN ON YOUR PROCUREMENT INVESTMENT

Critical Financial Oversight Around Corporate Spending

eRequester's web & mobile procurement and expense management solution offers rapid ROI, and infinite flexibility around set-up, reporting, and approval workflow. eRequester offers a fully-realized set of optional features and modules optimized around business productivity which means that you can get more value out of your eRequester investment.

Leverage your existing IT infrastructure and take advantage of eRequester's cost effective software licensing program, and its web-based system to provide secure, permissions-based access to financial information across the organization. Alternatively, eRequester SaaS is available to get up and going right away.

eRequester Cost Justification

Industry studies show that on average it costs between \$75 and \$100 to process a purchase order requisition. By using eRequester throughout your organization you may be able to streamline the purchasing process and experience significant soft cost savings.

In addition to the positive influence of implementing best practices in purchasing in the workplace, enjoy savings of up to \$31.50 per requisition. Big deal? You bet! Consider the savings in one year, let alone over many years.

UNDERSTANDING THE RELATIVE COST AND INVESTMENT

For many organizations the ongoing challenge is that ERP systems require costly seat licenses to provide access to the system, yet the majority of users of organizational financial data are not in the accounting department. Trying to control software infrastructure costs typically results in limited access to the ERP but increases the amount of randomizing and duplicative data entry tasks endured by accounting staff, such as worrying about making sure that purchase requests are accurate, running department reports, or making sure expense reports are approved.

eRequester offers an easy-to-use, economical platform for financial department managers to provide distributed, permissions-based access to spend management data across the business. eRequester also offers a valuable suite of optional features and modules optimized around business productivity which means that you can get more value out of your eRequester investment. Significant improvements in time management and organizational planning are suddenly not just possible, but are straightforward, and result in significant cost savings and ROI.

eRequester Return on Investment Calculations

To illustrate the value of eRequester and potential ROI we have put the following chart together for your reference to show why eRequester makes sense for your organization.

Organization Size	Small	Medium	Large
Requisitions/month	100	500	1000
Est. Monthly Savings	\$3,150	\$15,750	\$31,500
Est. Annual Savings	\$37,800	\$189,000	\$378,000
Est. number of users	20	50	100
Est. initial cost*	\$11,000	\$18,000	\$27,000
ROI Year 1	2.44%	9.5%	13%
Aggregate 2-year ROI**	4.87%	19%	26%

* Includes maintenance and remote installation, numbers are rounded to nearest thousand

** Calculated by doubling Y1 savings/(initial cost + maintenance renewal)
