

True Cloud Construction Software Gives Land Developers Access to Business-Critical Information Anytime, Anywhere

Manage your projects with ease and maintain complete control—from excavation through infrastructure.

As a land developer, you know it's essential to track your activities, specifications, engineering reports, schedules, and subcontractors so that you can minimize your road, water, wastewater, stormwater, electrical, gas, and other infrastructure costs.

Unfortunately, running a business with disconnected project teams can result in cost overruns, excessive paperwork, and frustration. That's why you need an integrated solution that you and your teams can access from anywhere.

Acumatica's true cloud construction software gives you total control over your land development projects. You can easily manage planned and actual budgets—including hard and soft costs and fees—with support for sub-jobs and industry-specific coding. The bottom line is that you'll increase your visibility and profitability on every project.

KEY FEATURES

Financial Management

Robust financials are simple enough for smaller contractors and scalable for more complex contractor needs. Acumatica Financial Management has standard financial processes (GL/AP/AR) and reports plus multi-company, multicurrency and intercompany accounting, fixed assets, recurring and deferred revenue, and cash management.

Job Cost Accounting

Easily manage AP workflows, from entering an invoice through approval routing and cutting checks. Seamless customer billing, driven by real-time project costing, including up-to-date costs on labor, material, equipment, and more. This detailed job cost information will help you proactively identify problem areas in current jobs and provide you with information to estimate future projects accurately.

Project Management

Gain a complete view of your project details—including real-time field updates—providing instantaneous information flow between your project management team, your back-office workforce, and management. Easily manage and track all activities, issues, changes, project documents, and job costs from one central area.

Payroll

Flexible payroll adapts to any construction organization. This solution supports multiple unions, locals, classes, benefit packages, and complex wages, as well as certified wages, executive compensation, and commission structures.

Commitments

Control cost overruns by automating your project commitments and change order processes. Easily create and track your subcontracts' status and purchase orders, including comparing budgets to actuals, tracking line-item committed costs, and monitoring up-to-date vendor payment status.

Compliance

Effectively manage lien waivers and releases, insurance certificates, and status updates, providing expiration and other alerts to staff and suppliers.

Customer Relationship Management

Easily see real-time data on all customer activities, including customer quotes, orders, invoices, payments, support cases, and service calls. Acumatica CRM also includes a self-service customer portal that lets customers access the information they need.

Mobile App

Get anytime, anywhere access. Quickly see critical reports on phones and tablets and give field teams and subcontractors tools to enter employee and equipment time electronically. Access the complete system over any device and search for all project details from one global search box.
